Mr. Dale Reamers  
Mentalix, Inc.  
1700 Alma Drive, Suite 110  
Plano, TX 75075

Dear Mr. Reamers:

The Federal Bureau of Investigation (FBI) Criminal Justice Information Services Division (CJIS) has completed a review of the testing information submitted by Mentalix, Inc., for certification. The Lexmark T630, 1200dpi Laser Fingerprint Printing System using Mentalix' CardPrint API Toolkit v1.2 software printing algorithm residing in a host computer running Windows-32 operating system, complies with the FBI Integrated Automated Fingerprint Identification System (IAFIS) Image Quality Specifications (IQS) standards. The review of the test data was conducted by representatives of the FBI and the MITRE Corporation image processing laboratory located in Bedford, Massachusetts.

Based on the results of this review, the FBI certifies that the Mentalix, Inc., Laser Fingerprint Printing System as described above is in compliance with the IAFIS, IQS, Appendix F Specifications created by the FBI CJIS Division. The certification process does not endorse one product over any other product. Certification only demonstrates that the product meets FBI standards.

Continued acceptance of the images created by an installed system, for retention in the FBI Master Fingerprint files, is contingent on the ability of the product to meet the IQS over time. As equipment can degrade over time, the FBI recommends that your company assist customers for your products in the establishment of quality assurance programs and appropriate maintenance schedules.

Please direct any questions regarding this certification to Mr. Thomas E. Hopper, at (202) 324-3506.

Sincerely yours,
